

# SLIMLINE™ WINDOW SYSTEM

for Narrow Frame Applications

*breezway*®

# Slimline™

Built for Strength and Durability

Featuring modern architectural lines, the **Slimline™ Altair® Louvre Window System** has been developed to suit narrow frame applications or for installation when screening is not required.

## High Performance Louvre Windows

Maximising the flow of cool breezes throughout a home is the most essential component of passive design. With the incorporation of high performance Breezway Altair Louvre Windows on opposing walls, fresh, cool air can flow in one side of the room and hot, stale air can escape through the other. The indoor temperature of the building can be lowered naturally to assist the comfort of the room, which can effectively remove the need for electric air conditioning altogether.

The Slimline Window System is great for installation near doorways or in internal walls to allow fresh air to circulate throughout the house and encourage better breeze-paths to keep your home feeling comfortable. By using aluminium or frosted glass blades you can provide privacy and the tight sealing of Altair Louvres means that conversations can remain private.

Locally manufactured, Altair Louvre Windows in the Slimline System are ideal for apartments, bungalows or any other project where fresh air and energy efficient control of the building environment is important.

## Slimline™ Window System Features

- The Slimline Window is an integrated window system specifically designed for use with Altair Louvres, resulting in high wind and water penetration performance.
- Conforms to performance requirements of International Standards.
- Manufactured exclusively from stainless steel, aluminium and UV-stabilised industrial strength plastics to ensure years of trouble-free operation.
- Stronghold System available for strength and safety in multi-story buildings or balcony enclosures.
- Available fully assembled and ready for installation, on-site labour costs can be significantly reduced.
- A variety of size, colour and blade options available.
- Warranted for 7 years.

**NOTE:** Altair Louvres can also be fitted into uPVC, timber and other aluminium surround frames if required.

Powder coated black with colour matched clips and standard handle.

Powder coated white with colour matched clips and low profile handle.

Natural anodised frame with black clips and ring handle.
